EQUIPMENT FOR CASINOS AND GAMING

WHY CHOOSING US

PLAYER HUB

The choice of an ergonomic PLAYER HUB is crucial to fully express the potential of the slot machine, the gaming tables and in general all the gaming applications, significantly increasing revenues. Comfort is determined by the combination of the following ergonomically designed elements: Ergonomic Cabinet, Slot base, Seat, Accessories.

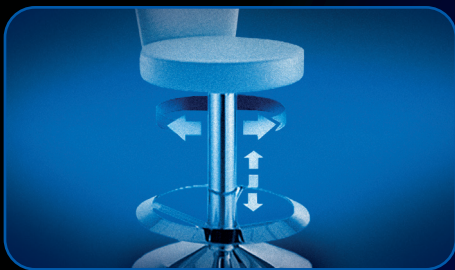

QUALITY

StylGame guarantees the quality of its products by directly sourcing all raw materials, from steel to the upholsterer's yarn, with a dedicated quality manager constantly monitoring all suppliers. Our products are certified by a third party according to European and international regulations.

COMFORT PLUS®

Thanks to continuous research and experimentation, StylGame is now able to offer a unique and revolutionary material, Comfort Plus®, positioned in between padding and upholstery. The main features are: micro massage, high ventilation, high resistance to deformation, high comfort.

RH ADJUSTABLE SYSTEM

The STYLGAME rotation mechanism is protected by two international patents and in a single container brings together three unique and essential features for the player's comfort: "clutch", "self centering mechanism", "height adjustment".

COIN-IN TEST

In order to prove the effectiveness of its ergonomic research applied to the PLAYER HUB, StylGame proposes to carry out a casinos coin-in test, providing the necessary components free of charge.

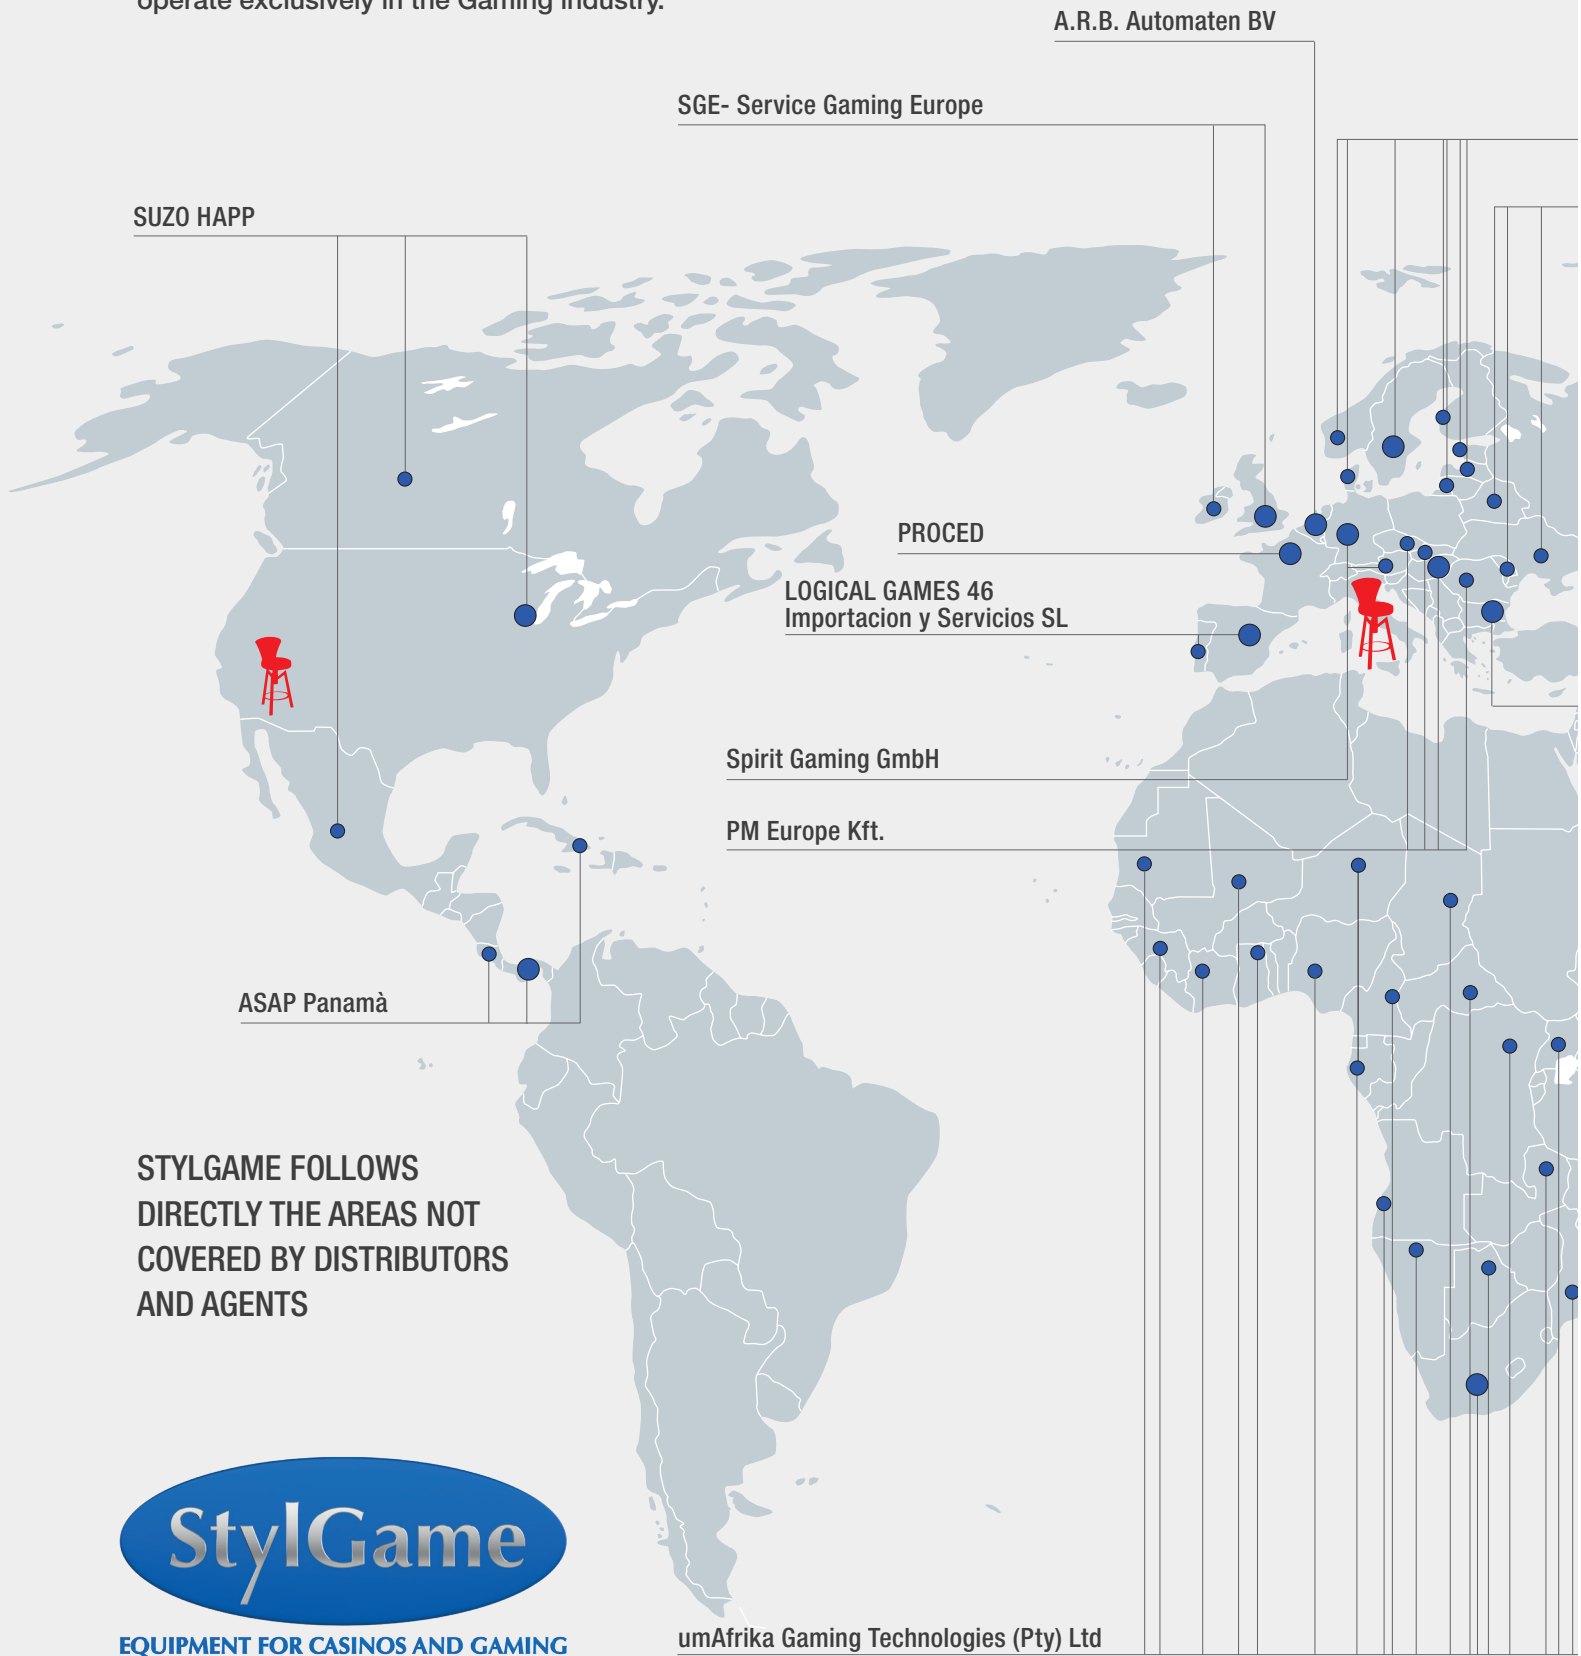

CUSTOMIZATIONS

Upon request, StylGame realizes prestigious customizations on its products: special color finishing and color combinations on metal, softness of the personalized seat, tone-on-tone or contrasting decorative stitching, embossed piping and so on.

OUR SALES NET

The sales network consists of strategically located offices and a widespread team of distributors and agents who operate exclusively in the Gaming industry.

SERVICE CALL

WHAT IS IT?

Service Call is a customer assistance system which prevents the player from leaving the playing station.

WHY CHOOSING IT?

- INCREASES THE HALL'S REVENUE
- OFFERS A PROMPT SERVICE THAT DISTINGUISHES THE HALL AND RETAINS THE CUSTOMER
- HELPS PLANNING STAFF'S TASKS
- MAKES THE STAFF'S JOB EASIER AND ALLOWS THE BEST MANAGEMENT OF THE FOLLOWING TASKS

CASH DESK

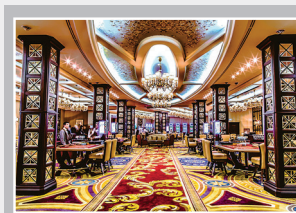

BAR RESTAURANT

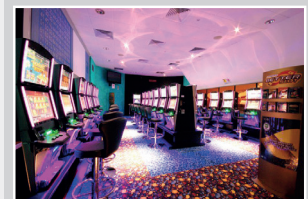

TECHNICAL SUPPORT

WHO IS IT SUITABLE FOR?

CASINOS

GAMING HALLS

BINGO HALLS

BOWLING HALLS

...ANY ACTIVITY INVOLVING A DIRECT SERVICE TO THE CUSTOMER

HOW DOES IT WORK?

SERVICE CALL IS A STAND-ALONE SYSTEM, WORKS INDEPENDENTLY AND DOES NOT INTERFERE WITH OTHER SYSTEMS USED IN THE HALL. IT DOES NOT REQUIRE ANY EXISTING COMMUNICATION LINE AND IT HAS VIRTUALLY NO RUNNING COSTS.

Devices for casino and gaming halls feature:

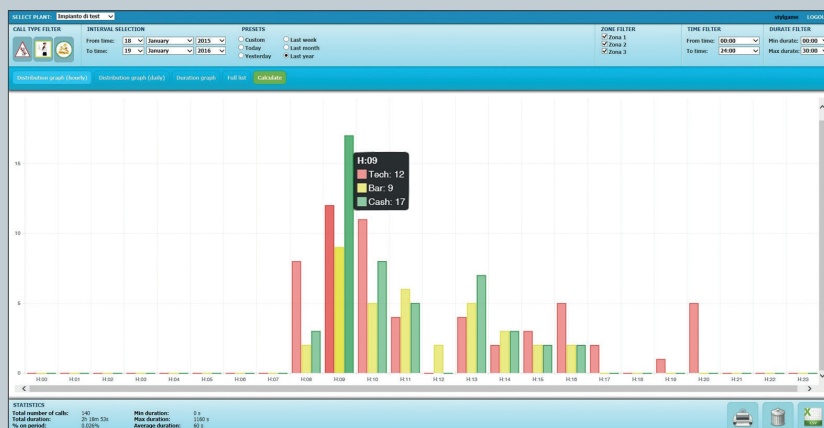

- 3 call buttons;
- 1 or 2 USB ports for battery charge of mobile phones or other devices;
- 1 support surface which lights up when the USB port is in use, as a reminder for the player.

The device dedicated to bingo halls consists of a push button to be placed in the middle of the table, easily reachable by each player.

The calls reception may be managed through one or more smart-phones, tablets or smart-watches, according to the number of employees working in the hall.

The system shows exactly from which device in the hall the call is coming.

The visualization of the device position on the hall layout allows the staff to give a quick and efficient service to the customer.

The system is supported by a dedicated software through which the hall manager controls the operations and the statistics related to the service offered, even if remotely connected through the web.

The interface is customizable in terms of graphics. Data can be transferred via the internet to a centralized control system for further processing.
